

MEC Technology Audit

Why you need a MEC Technology Audit

Information technology has changed the way organizations work. Pen and paper documents have been replaced with online data using a myriad of computerized applications. Lock and key filing cabinets have been replaced by passwords and identification codes. The implementation of innovative technology has helped organizations improve the efficiency of their business processes and increase data processing and transmission capacity, but it has also introduced new vulnerabilities. As a result, an independent technology audit is required to evaluate an organization's capacity to safeguard information and provide assurance that adequate measures have been taken to minimize the exposure to potential risks.

With Millennium Technology Audit (MTA), our seasoned technology officer will work side-by-side with your organization to assess and evaluate your processes to ensure:

Asset Safeguarding

Staff Skills

Awareness and productivity to plan, organize, acquire, deliver, support and monitor Information systems and services

Technology

Hardware, operating systems, database management, systems, networking, multimedia, etc.

Application System

The sum of manual and programmed procedures

Reliability of Information

Relates to the accuracy and completeness of information as well as its validity in accordance with the organization's set of values and expectations

Security and Privacy Issues

Relates to the safeguarding of data including user identity

Compliance

Deals with complying with laws, regulations and contractual arrangements to which the business process is subject

Availability

Relates to information being available when required by the business process

Don't be a Headliner!

"According to the Miami Herald, "on the dark web, these Social Security numbers sell for \$25 to \$35 a piece, Mike Sanchez, chief information security officer at UDT said. The information from just one school could easily be worth more than \$10,000."

Ransomware hit US schools at steady rate in 2022

BY: MATT KAPKO | JANUARY 4, 2023 | CYBERSECURITYDIVE

A ransomware attack over Labor Day weekend marks the second time Los Angeles Unified School District has felt the impact of a major cyberattack in one year.

Schools Are Getting Hit Hard By Cyberattacks. What Can They Do About It?

BY: FREDERICK HESS | OCTOBER 21, 2022 | FORBES

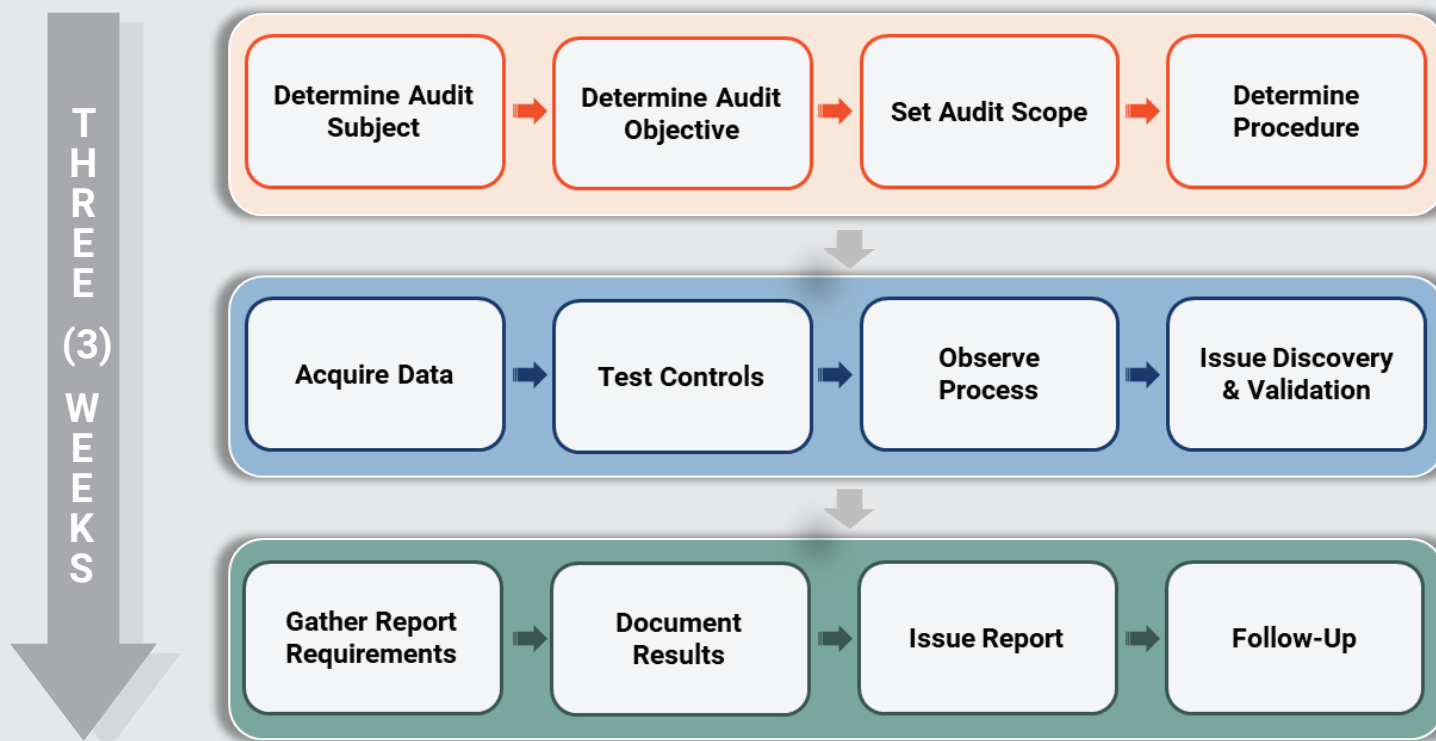

The issue for schools isn't just ransomware, but a range of cyber incidents including data breaches, ...

Stages of Millennium Technology Audit

The Millennium Technology Audit (MTA) process includes the following stages within a three (3) week timeframe:

Sub-steps of the MTA Stages
